

**Pre-Med Track Advisor Form**

*To be completed by Pre-Med Track Applicant's Undergraduate Advisor*

Dear Advisor,

Your undergraduate student is applying to be part of the MAHEC Pre-Med Track Program for the academic year 2024-2025. This program is aimed at increasing the number of successful Western North Carolina matriculants into medical schools.

One programming aspect is access to a Princeton Review MCAT Prep Course in Spring 2025. This course will include live virtual instruction for 3-hour evening classes twice a week (M/W or T/TH), running January through March. Specific class dates and times will be shared with applicants once they are determined.

This form is intended to gauge your student's readiness to participate in this review course and the Pre-Med Track program. Please print and complete the form to the best of your ability and return to your student so they can submit alongside copies of their unofficial transcript as part of the Pre-Med Track Application.

Student Information	
Student Name (please print)	
Undergraduate Institution Name	
Declared or Intended Major	
Anticipated Graduation Date	
Student Overall GPA	

The MCAT Prep Course offered by Princeton Review covers material shown on the MCAT Exam. Per AAMC recommendations, students should complete introductory biology, general chemistry, organic chemistry, physics, first semester psychology, sociology, and biochemistry before attempting the MCAT exam. The Princeton Review course is intended to be review and is not intended to teach students these concepts for the first time.

Based on the above student's academic record, do you believe them to have completed enough requirements to successfully complete the Princeton Review MCAT Prep course in the spring semester?

\_\_\_ Yes

\_\_\_ No

Would you recommend the above student for the Pre-Med Track Program for academic year 2024 – 2025?

\_\_\_ Yes

\_\_\_ No
