

Expanding Access to Care & Treatment (EXACT)

Goal: increase access to care for individuals with opioid use disorder (OUD) who are un-/underinsured and at high risk for overdose (OD) death by providing low-barrier access to medication for OUD (MOUD) and outpatient treatment services in a primary care clinic.

Participant Profiles

Sex Assigned at Birth

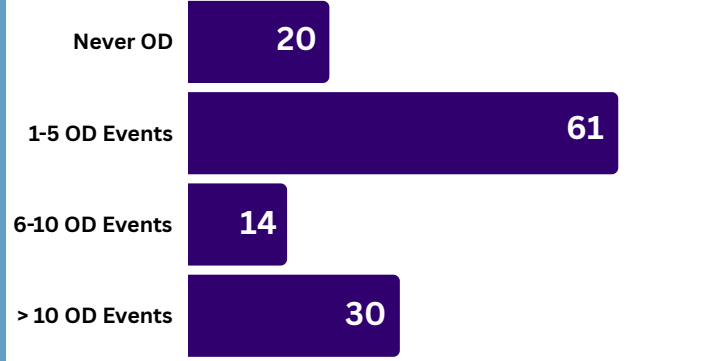

(n=168)

7.2 out of 10 participants were male

Lifetime OD Events*

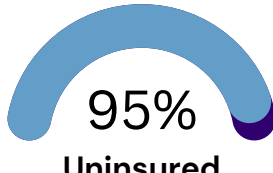

(n=126)

A third of participants experienced a recent OD event (past 30 days).

Insurance Status

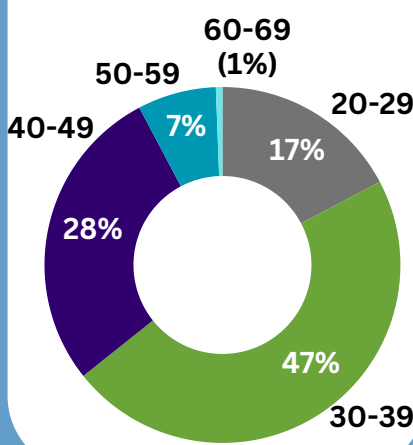

(n=128)

95%
Uninsured

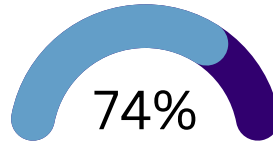

Age Range
